UNIVERSITY OF CALIFORNIA, MERCED | NET ZERO ENERGY DOWNTOWN ADMINISTRATION CENTER

The University of California, Merced (UC Merced)'s new administration center will consolidate administrative staff members in downtown Merced, bringing an economic boost to the neighborhood and connecting the campus more closely with the community. The new center will include some collaborative space for more campus-community partnerships and office space to consolidate teams of administrative staff currently split up into various off-campus sites.

Integral Group provided mechanical, electrical, and plumbing engineering services as well as energy consulting and lighting design. The project targeted LEED NC Platinum and Net Zero Energy. The administration center is a component of UC Merced's 2020 campus plan, on which Integral Group also worked.
